ECOCALMIX PROJECT: ECOFRIENDLY MIX BASED ON CALABRIAN CLAY FOR TANNING APPLICATIONS

Selection of claye
raw materials,
selection of the ty
planting material to
be treated

Application of
treatments (as it
and with new
formulations, to
selected skin

Comparison be
the various types
treatment and lo
the solution with
the best perform

Consolidation and
exportation of results

il futuro è un lavoro quotidiano

STARTING DATE: 29/09/2021

DURATION 18 MONTHS

WORKING PLAN: 5 WORK PACKAGES (WP1, WP2, WP3, WP4 and WP5)

Selection of clayey raw materials, selection of the type of tanning material to be treated

WP1

WP2

Application of treatments (classic and with new formulations) to selected skin types

Comparison between the various types of treatment and choice of the solution with the best performances

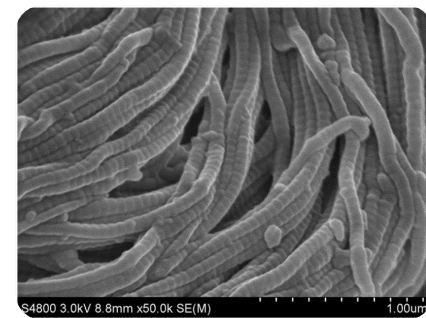

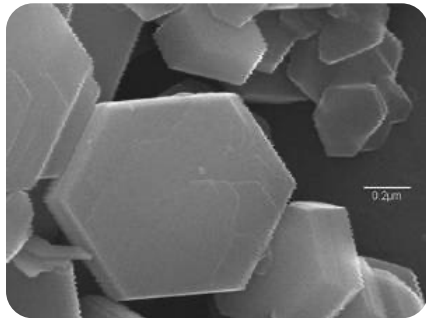

WP3

WP4

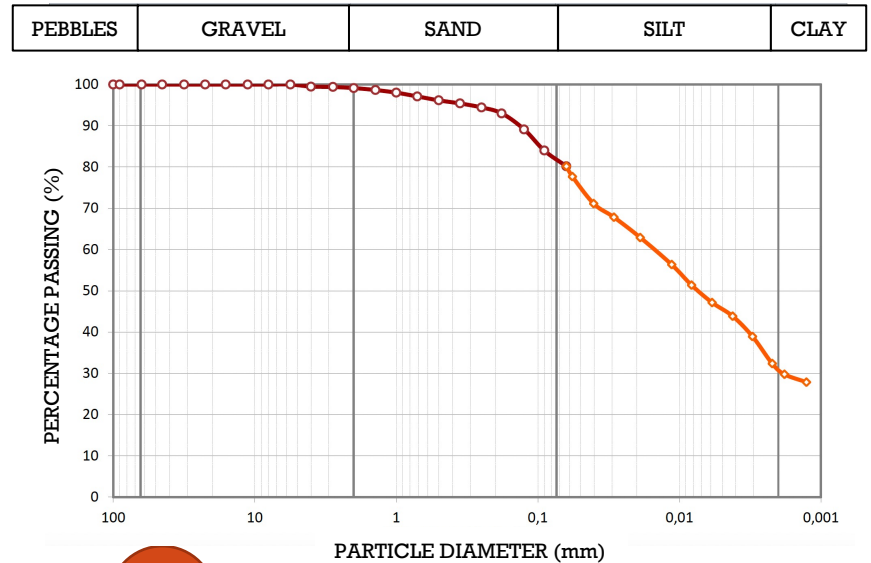

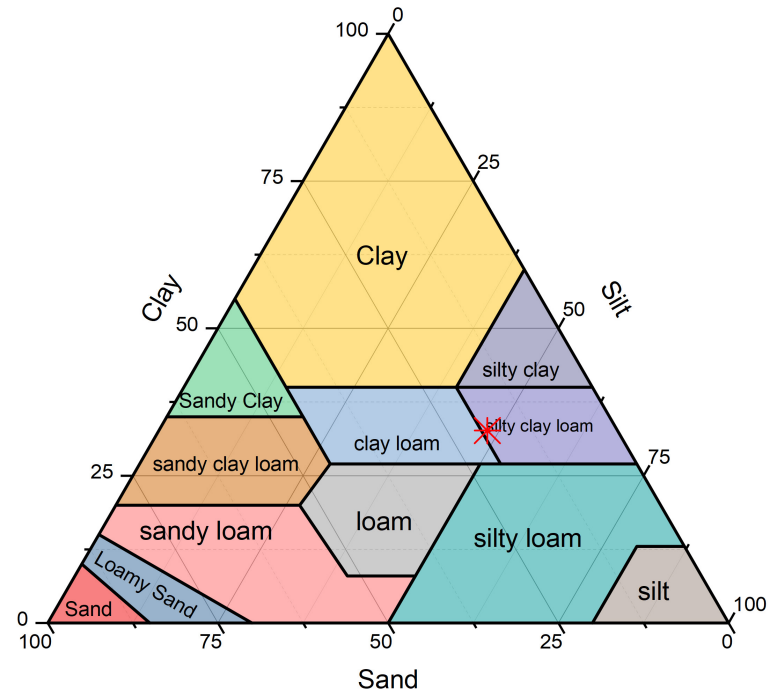

Project coordination and management

Dissemination and exploitation of results

WP5

1 SAMPLING

2 PRELIMINARY ANALYSIS

SAMPLING AND PRELIMINARY CHARACTERIZATION OF CLAYEY MATERIALS
